### Setup Student iPads

To test using iPads, keep in mind:

- There is no lockdown browser. Instead, you use the iPad's Guided Access feature *individually* on each device.
- Only the MAP test is supported on iPad, not MAP for Primary Grades.

Follow these steps:

#### 1. Before testing:

- Open the iPad settings.
- Choose **General** > **Accessibility** > **Guided Access**.
- Turn it **On**.
- Press **Set Passcode** and type a code that students will not know.

#### 2. Start of testing:

- In Safari, open the MAP testing site:

<https://test.mapnwea.org>

**Note:** Starting June 2014, you can no longer use the prior MAP testing URL: [pdx-map01.mapnwea.org](http://pdx-map01.mapnwea.org).

- Turn the iPad to landscape display.
- Triple-click the iPad Home button to open Guided Access:

- Draw two boxes around the toolbar controls—but not the refresh button:

- Turn off **Motion** to prevent the test from switching to portrait display.
  - Press **Start**.
  - Student can now join the test session.
- During testing** – Keep in mind that you cannot interrupt the test at the student's iPad. Use controls on the proctor computer instead.
  - After testing** – Triple-click the Home button again, and use the passcode to turn off Guided Access.
