

CHALLENGES (upside down)

- ★ Random Tues - Fri weeks
- ★ Low attendance on Fridays
- ★ Working ^{CMC} students have conflicts on Fridays
- ★ Less summer job opportunities (only 8 weeks total)
- ★ Short summer for family time

→ Add to Thanksgiving
★ Monday Holidays create weird weeks (Not needed?)

★ Thanksgiving W-Su is too short (Whole week) / Not well spaced out

• End is not in sight... June is loooooong

Spring break, lots of testing until EOY

CMC + LCSD have different breaks

Coming back in August is hard

Challenges

Works Well

★ Consistency of 4 days is great

Summer is loose less into

the apartment w/ a student in a apt. it is helpful because it allows for travel w/o missing school

The ability for students to work F, Sa, Su is a draw for students and they take advantage of it.

★ 3 days off give time to run errands on Friday work on one day and recover on one day. Teachers are more recovered.

X Consistency of the 4 days keeps curriculum in sync

★ Long breaks are really nice for Flex: F, Sa, Su in travel

★ Two week Christmas is nice because it is longer w/ 4 day waker

Friday is good for credit recovery
